

# HAWAII

## LOW PROFICIENCY AND HIGH ACCESS

**COMBINED NATIONAL OPPORTUNITY TO LEARN/PROFICIENCY STATE RANK: 33rd**

**Opportunity to Learn Index Score: 77% (7th)**

**Percentage of Students at National Proficient Level or Above: 20% (47th)**

<b>Disadvantaged Student Group<sup>1</sup></b>	<b>Opportunity to Learn (compared to White, non-Latino students)</b>
Native American	98%
Asian American/Pacific Islander	78%
Black	56%
Latino	83%
Poverty (FARL) <sup>2</sup>	70%

Hawaii’s Black, Latino and Native American students, taken together, have less than 80 percent of the opportunity to attend the state’s best-supported, best-performing schools than the state’s White, non-Latino students.<sup>3</sup> The state’s majority Asian American/Pacific Islander students also have less than 80 percent of the opportunity to attend the state’s best-supported, best-performing schools than the state’s White, non-Latino students. A low-income student has 70 percent of the opportunity to learn of the average White, non-Latino student.

<b>Opportunity to Learn Core Resource</b>	<b>Resource Access Rank</b>
Access to High Quality Early Childhood Education <sup>4</sup>	No Program
Access to Highly Qualified Teachers <sup>5</sup>	8th
Access to Instructional Materials <sup>6</sup>	18th
Access to College Preparatory Curriculum <sup>7</sup>	16th

The key Opportunity to Learn resources used in this report are high quality early childhood education, highly effective teachers, well-funded instructional materials and a college preparatory curriculum. All students must have equitable access to key educational resources if they are to have equitable opportunities for success.

*Key Research Findings: Hawaii is one of a group of states with comparatively low graduation rates, an average percentage of students from disadvantaged groups and comparatively high funding for instruction.*

# OPPORTUNITY FOR SUCCESS

## Hawaii Student Access to Well-Resourced, High-Performing Schools

Asian American, Black and low-income students are more likely than White, non-Latino students in Hawaii to be disadvantaged by attending schools where they have little chance of becoming proficient in basic skills and graduating on time. Asian American/Pacific Islander, Black students and low-income students are more likely to find themselves in such schools than are White, non-Latino students.

## Hawaii Students in Poorly-Resourced, Low-Performing Schools

\* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

Dividing the percentages of Native American, Black, Latino and low-income students in these “drop-out factories” by the percentage of White, non-Latino students in these schools gives us the comparative disadvantage of each group: (Higher numbers are worse: more of a disadvantage)

Group	Comparative Disadvantage
Native American students	90%
Asian American/Pacific Islander students	120%
Black, non-Latino students	140%
Latino students	90%
Low income students	150%
Comparison is to all White, non-Latino students	100%

Taking steps to improve access to key resources, improving the teacher-to-student ratio and increasing the percentage of highly effective teachers in the state’s less effective schools will improve the Opportunity to Learn of the state’s minority and low-income students.

## Economic Consequences<sup>8</sup>

### Total Annual Economic Burden to Taxpayers Because of Inequity: \$12 million<sup>9</sup>

	Potential Return on School Improvement Investment	250%
	State Annual Total Lifetime Health Loss	\$2 million
	State Annual Crime-Related Loss	\$1.5 million
	State Tax Losses (Lifetime)	\$8 million
	Annual Lost Lifetime Earnings (Difference attributable to high school graduation per annual cohort)	\$16 million
	Net Annual Potential Revenue Increase from Equity (After deducting estimated cost of improving schools)	\$7 million

\* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

## SOCIAL AND CIVIC CONSEQUENCES

Changes attributable to educational equalization with White, non-Latino students

	<b>College Graduation (25 years of age +)<sup>10</sup></b> Increase Expected Attributable to Equitable Access Black, Latino, Native American (total)	<b>154%</b>
	<b>Employment<sup>11</sup></b> Increase Expected Attributable to Equitable Access  With High School Diploma Further Increase with Bachelor's Degree	  3% 3%
	<b>Income<sup>12</sup></b> Increase Expected Attributable to Equitable Access  With High School Diploma Further Increase with Bachelor's Degree	  30% 51%
	<b>Health<sup>13</sup></b> Increase Expected Attributable to Equitable Access Black, non-Latino Latino	  15% 17%
	<b>Civic Engagement<sup>14</sup> (National Election Participation)</b> Increase Expected Attributable to Equitable Access	<b>1%</b>
	<b>Incarceration<sup>15</sup></b> Decrease Expected Attributable to Equitable Access to Education Black, non-Latino	<b>-80%</b>

<sup>1</sup> Enrollments (2005/6): Native American (1,085), Asian American/Pacific Islander (133,133), Black, non-Latino (4,323), Latino (8,163), White, non-Latino (36,114), FARRL (74,926).

<sup>2</sup> Students eligible for Free and Reduced Price Lunch. This measure is similar to the children living in poverty: Native American (<1%), Asian American (7%), Black, non-Latino (2%), Latino (12%), White, non-Latino (12%).

<sup>3</sup> The NAEP percentage of all public school students scoring at or above proficiency for Grade 8 Reading is used as a proxy for system quality.

<sup>11</sup> ACS.

<sup>12</sup> ACS.

<sup>13</sup> National Survey of Children's Health, Indicator 6.1. This report follows the practice of using the condition of health of White, non-Latinos as the baseline from which to measure the health of all groups. This is the meaning of the "100%," indicator. It does not mean that 100% of all White, non-Latinos are in good health. If the health of White, non-Latinos in a state were, in general, to improve (or deteriorate), the percentage indicators for historically disadvantaged groups would change proportionately.

<sup>14</sup> Potential Civic Engagement is represented by national voting rates by educational attainment applied to adult educational attainment of the state. U.S. Census Bureau.
