

TENNESSEE

LOW PROFICIENCY AND HIGH ACCESS

COMBINED NATIONAL OPPORTUNITY TO LEARN/PROFICIENCY STATE RANK: 37th

Opportunity to Learn Index Score: 54% (Tied-24th)

Percentage of Students at National Proficient Level or Above: 26% (Tied-37th)

Disadvantaged Student Group¹	Opportunity to Learn (compared to White, non-Latino students)
Native American	93%
Black	53%
Latino	64%
Poverty (FARL) ²	No data

Tennessee ranks 37th among the states when the Opportunity to Learn of the state's disadvantaged students is combined with a measure of educational quality.³ Tennessee's Native American, Asian American, Black and Latino and students, taken together, have slight more than half the opportunity to attend the state's best-supported, best-performing schools as the state's White, non-Latino students.

Opportunity to Learn Core Resource	Resource Access Rank
Access to High Quality Early Childhood Education ⁴	14th
Access to Highly Qualified Teachers ⁵	18th
Access to Instructional Materials ⁶	40th
Access to College Preparatory Curriculum ⁷	25th

The key Opportunity to Learn resources used in this report are high quality early childhood education, highly effective teachers, well-funded instructional materials and a college preparatory curriculum. All students must have equitable access to key educational resources if they are to have equitable opportunities for success.

Key Research Findings: Tennessee is one of a group of states with comparatively average graduation rates, percentage of students from disadvantaged groups and funding for instruction.

OPPORTUNITY FOR SUCCESS

Tennessee Student Access to Well-Resourced, High-Performing Schools

Native American, Asian American, Black and Latino students are more likely than White, non-Latino students in Tennessee to be disadvantaged by attending schools where they have little chance of becoming proficient in basic skills and graduating on time. Black students are more than twice as likely to find themselves in such schools than are White, non-Latino students.

Tennessee Students in Poorly-Resourced, Low-Performing Schools

* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

Dividing the percentages of Native American, Black, Latino and low-income students in these “drop-out factories” by the percentage of White, non-Latino students in these schools gives us the comparative disadvantage of each group: (Higher numbers are worse: more of a disadvantage)

Group	Comparative Disadvantage
Native American students	110%
Asian American students*	120%
Black, non-Latino students	240%
Latino students	170%
Low income students	No data
Comparison is to all White, non-Latino students	100%

Taking steps to improve access to key resources, improving the teacher-to-student ratio and increasing the percentage of highly effective teachers in the state’s less effective schools will improve the Opportunity to Learn of the state’s minority and low-income students.

Economic Consequences⁸ Total Annual Economic Burden to Taxpayers Because of Inequity: \$672 million⁹

	Potential Return on School Improvement Investment	250%
	State Annual Total Lifetime Health Loss	\$132 million
	State Annual Crime-Related Loss	\$87 million
	State Tax Losses (Lifetime)	\$453 million
<hr/>		
	Annual Lost Lifetime Earnings (Difference attributable to high school graduation per annual cohort)	\$933 million
	Net Annual Potential Revenue Increase from Equity (After deducting estimated cost of improving schools)	\$414 million

* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

SOCIAL AND CIVIC CONSEQUENCES

Changes attributable to educational equalization with White, non-Latino students

	College Graduation (25 years of age +)¹⁰ Increase Expected Attributable to Equitable Access Black, Latino, Native American (total)	62%
	Employment¹¹ Increase Expected Attributable to Equitable Access With High School Diploma Further Increase with Bachelor's Degree	5% 5%
	Income¹² Increase Expected Attributable to Equitable Access With High School Diploma Further Increase with Bachelor's Degree	35% 68%
	Health¹³ Increase Expected Attributable to Equitable Access Black, non-Latino Latino	17% 30%
	Civic Engagement¹⁴ (National Election Participation) Increase Expected Attributable to Equitable Access	2%
	Incarceration¹⁵ Decrease Expected Attributable to Equitable Access to Education Black, non-Latino Latino	-77% --%

¹ Enrollments (2005/6): Native American (1,730), Asian American (13,541), Black, non-Latino (239,422), Latino (36,670), White, non-Latino 622,544), FARRL (449,622).

² Students eligible for Free and Reduced Price Lunch. This measure is similar to the state's percentage of children living in poverty: Native American (34%), Asian American (18%), Black, non-Latino (41%), Latino (40%), White, non-Latino (17%).

³ The NAEP percentage of all public school students scoring at or above proficiency for Grade 8 Reading is used as a proxy for system quality.

¹² ACS.

¹³ National Survey of Children's Health, Indicator 6.1. This report follows the practice of using the condition of health of White, non-Latinos as the baseline from which to measure the health of all groups. This is the meaning of the "100%," indicator. It does not mean that 100% of all White, non-Latinos are in good health. If the health of White, non-Latinos in a state were, in general, to improve (or deteriorate), the percentage indicators for historically disadvantaged groups would change proportionately.
