

# WASHINGTON

**MODERATE PROFICIENCY AND HIGH ACCESS**

**COMBINED NATIONAL OPPORTUNITY TO LEARN/PROFICIENCY STATE RANK: 6th**

**Opportunity to Learn Index Score: 61% (Tied-12th)**

**Percentage of Students at National Proficient Level or Above: 34% (Tied-16th)**

<b>Disadvantaged Student Group<sup>1</sup></b>	<b>Opportunity to Learn (compared to White, non-Latino students)</b>
Native American	72%
Black	69%
Latino	60%
Poverty (FARL) <sup>2</sup>	66%

Washington ranks 6th among the states when the Opportunity to Learn of the state’s disadvantaged students is combined with a measure of educational quality. Washington’s Black, Latino and Native American students, taken together, have less than two-thirds of the opportunity to learn in the state’s best-supported, best-performing schools than the state’s White, non-Latino students, as does a low-income student of any race or ethnicity.

<b>Opportunity to Learn Core Resource</b>	<b>Resource Access Rank</b>
Access to High Quality Early Childhood Education <sup>4</sup>	17th
Access to Highly Qualified Teachers <sup>5</sup>	38th
Access to Instructional Materials <sup>6</sup>	35th
Access to College Preparatory Curriculum <sup>7</sup>	13th

The key Opportunity to Learn resources used in this report are high quality early childhood education, highly effective teachers, well-funded instructional materials and a college preparatory curriculum. All students must have equitable access to key educational resources if they are to have equitable opportunities for success.

*Key Research Findings: Washington is one of a group of states with a high graduation rate, an average percentage of students from disadvantaged groups and comparatively low funding for instruction. Schools in the state with higher percentages of more teachers with advanced degrees tend to have higher graduation rates and better achievement measures. This is particularly important for Latino and poor students. Larger classes are associated with poorer outcomes in Washington.*

# OPPORTUNITY FOR SUCCESS

## Washington Student Access to Well-Resourced, High-Performing Schools

Native American, Asian American, Black and Latino students and low-income students are more likely than White, non-Latino students in Washington to be disadvantaged by attending schools where they have little chance of becoming proficient in basic skills and graduating on time. Black and Latino students are twice as likely as White students to attend such schools.

## Washington Students in Poorly-Resourced, Low-Performing Schools

\* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

Dividing the percentages of Native American, Black, Latino and low-income students in these “drop-out factories” by the percentage of White, non-Latino students in these schools gives us the comparative disadvantage of each group: (Higher numbers are worse: more of a disadvantage)

Group	Comparative Disadvantage
Native American students	160%
Asian American students*	140%
Black, non-Latino students	210%
Latino students	210%
Low income students	170%
Comparison is to all White, non-Latino students	100%

Taking steps to improve access to key resources, improving the teacher-to-student ratio and increasing the percentage of highly effective teachers in the state’s less effective schools will improve the Opportunity to Learn of the state’s minority and low-income students.

## Economic Consequences<sup>8</sup> Total Annual Economic Burden to Taxpayers Because of Inequity: \$507 million<sup>9</sup>

	Potential Return on School Improvement Investment	250%
	State Annual Total Lifetime Health Loss	\$100 million
	State Annual Crime-Related Loss	\$65 million
	State Tax Losses (Lifetime)	\$342 million
<hr/>		
	Annual Lost Lifetime Earnings (Difference attributable to high school graduation per annual cohort)	\$704 million
	Net Annual Potential Revenue Increase from Equity (After deducting estimated cost of improving schools)	\$313 million

\* Performance for sub-groups of the Asian American populations (Hmong, Cambodian, etc.) varies drastically. Further federal and state disaggregation of data is needed to more accurately speak to performance results of Asian Americans.

## SOCIAL AND CIVIC CONSEQUENCES

Changes attributable to educational equalization with White, non-Latino students

	<b>College Graduation (25 years of age +)<sup>10</sup></b> Increase Expected Attributable to Equitable Access Black, Latino, Native American (total)	<b>120%</b>
	<b>Employment<sup>11</sup></b> Increase Expected Attributable to Equitable Access  With High School Diploma Further Increase with Bachelor's Degree	  4% 3%
	<b>Income<sup>12</sup></b> Increase Expected Attributable to Equitable Access With High School Diploma Further Increase with Bachelor's Degree	  42% 72%
	<b>Health<sup>13</sup></b> Increase Expected Attributable to Equitable Access Black, non-Latino Latino	  --% 35%
	<b>Civic Engagement<sup>14</sup> (National Election Participation)</b> Increase Expected Attributable to Equitable Access	<b>1%</b>
	<b>Incarceration<sup>15</sup></b> Decrease Expected Attributable to Equitable Access to Education Black, non-Latino Latino	  -90% --%

<sup>1</sup> Enrollments (2005/6): Native American (27,208), Asian American (83,085), Black, non-Latino (58,514), Latino (139,005), White, non-Latino (712,499), FARL (376,198).

<sup>2</sup> Students eligible for Free and Reduced Price Lunch. This measure is similar to the state's percentage of children living in poverty: Native American (39%), Asian American (9%), Black, non-Latino (37%), Latino (30%), White, non-Latino (12%).

<sup>3</sup> The NAEP percentage of all public school students scoring at or above proficiency for Grade 8 Reading is used as a proxy for system quality.

<sup>11</sup> ACS.

<sup>12</sup> ACS.

<sup>13</sup> National Survey of Children's Health, Indicator 6.1. This report follows the practice of using the condition of health of White, non-Latinos as the baseline from which to measure the health of all groups. This is the meaning of the "100%," indicator. It does not mean that 100% of all White, non-Latinos are in good health. If the health of White, non-Latinos in a state were, in general, to improve (or deteriorate), the percentage indicators for historically disadvantaged groups would change proportionately.

<sup>14</sup> Potential Civic Engagement is represented by national voting rates by educational attainment applied to adult educational attainment of the state. U.S. Census Bureau.
